DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-5 and 8, drawn to a truss structure, classified in class 52, subclass 493.
- II. Claims 6 and 7, drawn to a die and a method of using the die, classified in class 72, subclass 377.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by manually hammering the ends.

A telephone call was made to Mr. James McKeown on March 29, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
